

QUALITY CONTROL PROGRAMS

VACUUM TESTED - CERTIFIED TANKS LOOK FOR **RED TAG** ID ON EVERY TANK

NPCA CERTIFIED PLANTS

The NPCA Plant Certification Program is a challenging test of a plant's ability to produce quality precast concrete products. Administered by Wiss, Janney, Elstner, Associates, Inc., a world-renowned engineering and materials science firm, the inspection is a comprehensive look at all aspects of precast concrete production. Precast plants that become certified must meet high standards in all areas of **production, safety and information management.**

Kistner Concrete Products, Inc. plants have proven its commitment to producing the highest quality of precast products by joining this elite group of precasters. Specifiers and contractors who purchase products from Kistner Concrete Products, Inc. certified plants, can be assured that they are buying from a professional organization dedicated to providing the customer quality products.

Ensures quality, strong, durable and water tight tanks

NEW YORK STATE SEPTIC TANK ASSOCIATION

Kistner is one of only **four** producers in New York State accredited by the PCANY accreditation program. This program gives municipalities, specifiers, regulators, installers and homeowners assurance that the precast concrete tank they are purchasing comes from a quality manufacturer and will be **long lasting, structurally sound and watertight.** The plastics and fiberglass industries do not have a comparable program.
