

RETAIN-IT

Precast Concrete Subsurface Stormwater: Storage / Retention Detention / Treatment System

I am writing to you to present our New & Superior Precast Concrete Retention / Detention Product for consideration on this project.

The product is Retain -IT - A strong steel reinforced H-20 Loading Precast Concrete Retention / Detention System Now available locally.

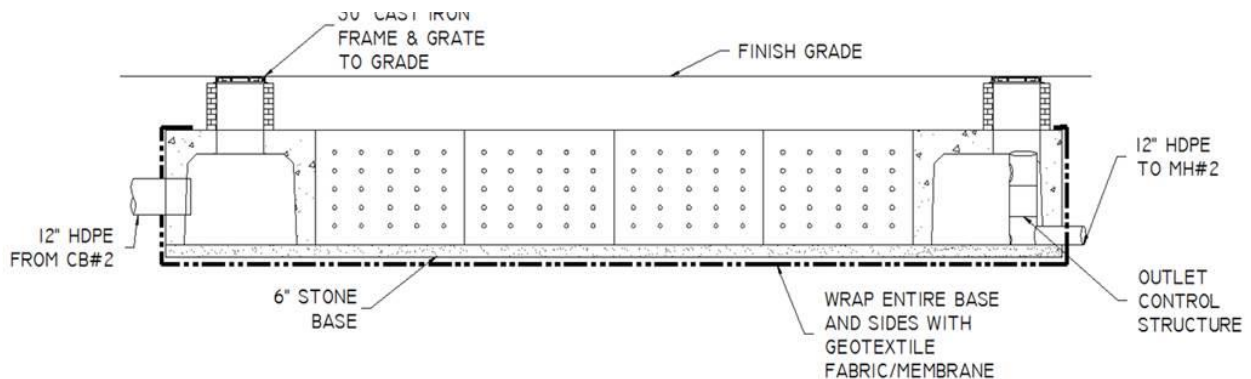

Description:

Simplicity & Flexibility | retain-it Stormwater Management System modules are intentionally both simple and flexible.

All modules have an 8 x 8 footprint, with interior height options ranging from 1 through 5 feet.

Where site conditions permit, modules can be stacked easily to increase vertical interior storage up to 10.67 feet.

Modules exceed HS-20 loading requirements and can be installed with minimal cover. Virtually any control or feature imaginable can be designed into the interior of each module - one uniform box with endless design possibilities

Typical retain-it SMS Detention System

Please review the attached and consider Retain-It for this project as well as future projects. Kistner will be locally Manufacturing Retain-It in one of its 4 - NYSDOT QA/QC Manufacturing facilities.

Thank you for your consideration...
